

# PRIVACY POLICY

## SEQAMI Application

Version 1.0 — 7 March 2026

---

### 1. Overview

SEQAMI is a mobile application dedicated to scientific research. It collects data as part of a scientific study, through questionnaires submitted to participants, supplemented by technical metadata about application usage.

SEQAMI is intended for adults only (18 years of age and older).

---

### 2. Data anonymity — our core commitment

All data collected by SEQAMI is **strictly and irreversibly anonymous**. No information that could identify a user, directly or indirectly, is collected, stored or transmitted.

This anonymous nature has been verified and validated by the Data Protection Officer (DPO) of Sorbonne University, as well as the research ethics committee of Sorbonne University, as part of the approval of the research protocol.

There is no technical means of linking the collected data to any particular user.

---

### 3. Data collected

#### 3.1 Questionnaire responses

The application presents scientific questionnaires. Your responses are recorded with no associated identifier. They contain only the content of your answers to the questions asked.

#### 3.2 Technical usage metadata

In order to ensure the scientific quality of the data, the application automatically records anonymous technical metadata:

- timestamps of responses to questions (rounded to the second)
- periods of activity within the application: the application detects moments when you are actively interacting with the interface for at least 3 consecutive seconds

These metadata contain no identifier and cannot be used to identify you.

---

### 4. What SEQAMI does not collect

SEQAMI **does not access or collect**:

- your name, email address, or any personal identifier
- your geographical location (GPS or network-based)
- images or sounds captured by your camera or microphone
- your contacts, calendar, or the content of other applications

- your IP address or any network identifier
  - advertising identifiers or tracking cookies
- 

## **5. Use of data**

The data collected is used exclusively for scientific research purposes, within the strict scope of the study for which SEQAMI was developed. It is used to produce aggregated statistical analyses.

It is never used for commercial, advertising, or profiling purposes.

---

## **6. Security**

Appropriate technical measures are in place to protect collected data against unauthorised access, including encryption of data in transit and at rest. Access is restricted to authorised members of the research team only.

---

## **7. Contact**

For any questions regarding this policy or the SEQAMI study, please contact the research team:
